Sensor 1: Jackson Sq

Sensor View and Numina Behavior Zones

name: `Northern Ave`

alias: `bos-1`

serialno: `NUM202B002S0041`

feedId: `b3d1294c14c6452799b4963271a5c939`

rawId: `0e01ae2376a34d359eee3138bbfcdd80`

location: `{'lat': 42.353300853514, 'lon': -71.0465010846789}`

Behavior Zone descriptions:

1. **Northside Sidewalk [pictured in green]:** Captures the northside sidewalk of Center Street and Lamartine Street. Quantifies primarily pedestrian traffic and bicycles riding on the sidewalk.

2. **Eastside Crosswalk [pictured in blue]:** Captures crosswalk on east side of the intersection. Quantifies primarily pedestrian and bicycle traffic within the crosswalk.

3. **Westbound Lanes [pictured in pink]:** Captures westbound vehicle lanes. Quantifies primarily car, bus, and truck activity.

4. **Eastbound Lanes [pictured in yellow]:** Captures westbound vehicle lanes. Quantifies primarily car, bus, and truck activity.

Data available:

On Analyze Boston, you may find:

- CSV file(s) of volume counts for July 13, 2020 - February 5, 2021
- Numina-generated monthly reports summarizing Behavior Zone data for the period August 1, 2020 - January 31, 2021. These reports include:
    - Mode share
    - Volumes plotted by day and by bour
    - Dwell times
    - Heatmaps
